## Available Courses

### Using the ISA/IEC 62443 Standards to Secure Your Control Systems (IC32)

10-11 June 2019

Learn how to interpret and apply the ANSI/ISA99 industrial security guidelines to your operation by focusing on creating effective long-term program security and current trends in industrial cybersecurity.

### Technician Training Boot Camp (TTBC) **BESTSELLER!**

15-19 July 2019

Join us for a week of intensive training covering a broad range of technical topics from basic instrumentation fundamentals to smart technology. Over 75% of your time will be spent on equipment labs.

### Tuning Control Loops (TC05)

12-14 August 2019

Gain a better understanding of how to tune control loops. Must have a basic knowledge of instrumentation and controls, but this course is suitable for individuals who have no experience tuning control loops.

### Troubleshooting Instrumentation and Control Systems (TC10)

15-16 August 2019

Develop a systematic approach to troubleshooting and start-up of single- and multi-loop control loops. Take TC05 and TC10 together and save with our multi-registration rate.

### Control Systems Engineering PE Exam Review Course (EN00)

16-18 September 2019

Review the knowledge and skills that are included on the Control Systems Engineer (CSE) Professional Engineer (PE) exam.

### Industrial Data Communications Systems (TS06)

7-11 October 2019

Design and maintain industrial communications systems on your plant floor.

### Industrial Networking & Security (TS12)

14-18 October 2019

Learn the latest developments in networking, including practical tips on designing, implementing, and testing TCP/IP-based networks and how to apply them securely and reliably in an industrial environment.

### Introduction to Industrial Processes, Measurement, and Control (FG07)

11-15 November 2019

Build a foundation for communication with other control systems professionals through this hands-on review of industrial measurement and control.
